Hiring Manager / Talent Acquisition Team

Subject: Application for Game QA Lead / QA Project Lead

Dear Hiring Manager,

I am applying for a Game QA Lead or QA Project Lead role with your studio. I bring 7+ years of game QA experience, including more than three years as Project Lead – Game Testing at IGT Solutions, where I lead a team of 10+ QA engineers and hold QA sign-off authority for every milestone and release.

At IGT, my team has shipped 40+ live Steam titles for European and US studios, including Jewel Match Origins 3 and Buluk Mayan Warfare, while also managing QA for 19+ UAE indie-studio titles per month. I own release management from Pre-Alpha through Gold Master, Patch/Hotfix, and post-launch LiveOps. Alongside QA leadership, I handle project ownership: test estimation, resource planning, defect triage, vendor management, and client communication across time zones.

Two strengths define how I lead. Under crunch, I re-scope to a documented, risk-based critical path and protect regression testing, so release quality holds when deadlines tighten. When team members leave mid-project, I pair new testers with experienced ones and use documented test cases as the handover, so test coverage is never lost.

Before IGT, I performed QA on For Honor, a AAA cross-platform title, at Ubisoft; led QA for a real-money iGaming product at Passion Gaming; and tested CSR 2 and slot titles at Indium Software. This range across AAA, live-service mobile, and iGaming lets me adapt quickly to your games and pipeline.

My day-to-day toolkit includes JIRA (admin and workflow setup), TestRail, Unity3D, Unreal Engine 5, Git, and CI/CD pipelines, working within Agile and Scrum. I define QA strategy, monitor crash-free rate and QA metrics such as defect density, defect escape rate, and test coverage, conduct Root Cause Analysis on critical defects, and have acted as Localization Lead for multi-region releases.

I would welcome the chance to discuss how I can strengthen quality and release predictability for your team. Thank you for your time and consideration.

Sincerely,
Rahul Sharma
