PROFESSIONAL SUMMARY

Game QA Lead with 7+ years in game testing, including AAA console QA on For Honor at Ubisoft. At IGT Solutions, I lead up to 10 QA engineers and own project delivery, release sign-off, and client communication for studios in Europe, the US, and the UAE. Shipped 40+ live Steam titles and manage QA for 19+ UAE indie-studio titles per month across casual, puzzle, strategy, action, and iGaming genres. Key results: 90%+ of releases shipped with zero critical post-launch defects, regression cycles cut by around 40%, and a 99%+ crash-free rate on live titles. Known for go/no-go decisions made from data, root-cause analysis on escaped defects, and documented processes that hold test coverage through crunch time and team churn.

CORE COMPETENCIES

Game QA – PC/Console/Mobile/Web | Project & Release Management | QA Strategy & Test Planning | Stakeholder & Client Management | Agile / Scrum / Sprint Planning | SDLC / STLC / Build Management | Team Leadership & People Management | Defect Triage & RCA | Live Service / GaaS & LiveOps | AAA & Indie Titles

WORK EXPERIENCE

Project Lead – Game Testing

IGT Solutions Pvt Ltd, Gurugram (Gurgaon) | Jun 2023 – Present

Tools: JIRA (Admin, Workflows, Sprint Boards), TestRail, Unity3D, Unreal Engine 5, Git, MySQL, MS Excel, MS Project

- Lead a team of up to 10 QA engineers across concurrent client projects; recruit, onboard, and train testers; shipped 40+ live Steam titles for European and US studios, including Buluk Mayan Warfare, Jewel Match Solitaire Seasons CE, and Jewel Match Origins 3, and manage QA for 19+ UAE indie-studio titles per month.
- Hold QA sign-off authority for milestone and release approvals; on Buluk Mayan Warfare (AA, PC), issued a No-Go verdict with 15 of 24 S1/S2 defects unresolved and set a P0/P1/P2 fix plan that directed engineering to root causes.
- Led root-cause analysis on a client-reported escape on Jewel Match Solitaire Seasons CE; introduced a 29-case compatibility suite and a 7-case interrupt suite before the September 2024 go-live.
- Audited a 25-requirement traceability matrix, found 3 coverage gaps and 2 mobile requirements in a PC-only scope, and raised new test cases to close every gap.
- Built 204 documented test cases and regression suites that cut regression cycle time by around 40%, reaching a 94.4% pass rate at checkpoint across 31 builds; de-duplicated 466 daily-log status lines into 212 unique defects for accurate client reporting.
- Own project plans, test estimation, resource allocation, defect triage, and weekly client status reporting as the primary point of contact for international clients; lead sprint retrospectives, backlog grooming, and stand-ups; administer Jira workflows, screens, custom fields, and permissions.
- Manage release readiness from Alpha and Beta through Gold Master, Patch/Hotfix, and post-launch LiveOps, with 90%+ of releases shipping free of critical post-launch defects and a 99%+ crash-free rate on live titles; author test plans, RTMs, SOPs, triage, closure, postmortem, and incident reports; act as Localization Lead for multi-region releases.
- Manage crunch time by re-scoping to a written, risk-based critical path while protecting regression testing; handle team churn through paired onboarding and documented test cases, so coverage is never lost mid-project.

Senior QA Analyst – Freelance

Passage.io, USA (Remote) | Mar 2023 – Jun 2023

Tools: Unreal Engine 5, Trello, MySQL, Plastic SCM, MS Excel

- Shipped Passage World Building, a real-time blockchain/NFT metaverse live-service game with virtual land, in-app purchase (IAP) commerce, and social collaboration; executed regression, exploratory, performance, UX, and edge-case testing across all build iterations.

Senior Quality Analyst

Passion Gaming Pvt Ltd, Gurugram | Jul 2022 – Feb 2023

Tools: JIRA, TestRail, Unity3D, MySQL, Postman, Swagger, Git

- Led QA for Rummy Passion (real-money iGaming) across Cash, Sit-N-Go, Pool, Points, and Deals modes; created test plans, PRDs, and test cases; ran defect triage; and validated IAP flows, KYC, back-office tournament events, and lottery rewards through full STLC delivery.

Testing Engineer – Level 2

Indium Software Pvt Ltd, Bengaluru | Jul 2021 – Jul 2022

Tools: JIRA, TestRail, Media Shuttle, MS Excel

- Delivered end-to-end testing for CSR 2 (mobile drag racing: PvP, PvE, and Campaign) and iGaming slot titles; validated clipping, object behavior, DLC, animations, VFX/SFX, and event rewards; identified critical crash scenarios through edge-case analysis.

Game Tester – QA/QC

Ubisoft Entertainment Pvt Ltd, Pune | Jul 2019 – Jul 2021

Tools: JIRA, PS4 Neighborhood, Telescope, Bloomberg (Ubisoft in-house crash reporter), MS Excel

- Performed QA on For Honor, a AAA cross-platform hack-and-slash title (PS4/Xbox/PC); executed multiplayer and network testing; validated fight mechanics, clipping, DLC, VFX/SFX, and cinematics; performed defect triage and recommended test procedure improvements.

Game Tester (Intern)

U2opia Mobile, Gurugram | Apr 2019 – Jun 2019

- Tested 5 mobile titles on Google Play and the App Store; created test cases and checklists; tracked KPIs via Firebase, IronSource, and Google Analytics.

Software QA Analyst (Intern)

I-Tuple Technologies, Gurugram | Dec 2018 – Apr 2019

- Performed API testing on Milkbasket (e-commerce app) using Postman, Swagger, and JIRA; designed and executed test cases.

TECHNICAL SKILLS

Platforms: PC, Console (PS4/Xbox), Mobile (iOS/Android), Web, Steam; AR/VR (exposure)

Game Engines: Unity3D, Unreal Engine 5

Game Genres: Action, Online Multiplayer, Casual, Puzzle, Strategy, Racing, iGaming, Live Service (GaaS), Metaverse

Test Management: JIRA (Admin, Workflows, Sprint Boards), TestRail, Xray, Trello, Asana

Methodologies: Agile, Scrum, Kanban, Waterfall, Sprint Planning

Test Strategy: Risk-Based Testing, Release Readiness & Go/No-Go Assessment, Quality Gates, Entry/Exit Criteria, Regression Strategy, Compatibility Matrix Planning, Test Coverage Analysis

Testing Types: Functional, Regression, Progression, Compatibility, Localization, Exploratory, Interrupt, Multiplayer, Network, UX, Monetization, UAT, E2E, Performance, Cross-Platform, Patch/Hotfix, Post-Launch

QA Process: QA Strategy, Test Planning, Test Estimation, Test Matrix, RTM, Defect Life Cycle, Defect Triage, RCA, Test Coverage, QA Sign-off, Build Management, Crash-Free Rate

Project Management: Project Delivery, Delivery Governance, Capacity Planning, Escalation Management, Stakeholder Management, People Management, Release Management, Backlog Grooming, Sprint Retrospectives, KPI Reporting, SLA, Risk Management, Resource Allocation, Vendor Management, Offshore Team Management

API & Automation: Postman, Swagger, Android Studio, Selenium WebDriver (basic), Appium (POC)

Data, Version Control & Reporting: MySQL, Git, GitHub, Plastic SCM, MS Excel (dashboards, pivots), MS Project, PowerPoint, Slack, Firebase, Google Analytics

EDUCATION

Bachelor of Technology (B.Tech), Computer Science | Manav Rachna International University, Faridabad | 2017

AWARDS & ACHIEVEMENTS

Spot Award – Active Testing Excellence, Indium Software | 1st Runner-Up – Battleground QA Event 2020, Ubisoft Entertainment
